The gentleman from New York says that he will propose an amendment providing that this change in our law shall not affect contracts already made. Let me remind him there is no intention of affecting these contracts, which, according to the present laws, are made payable in gold. But if he means to say that we cannot change our monetary system without protecting those who have loaned money before the change was made, I want to ask him where, in law or in morals, he can find authority for not protecting the debtors when the act of 1873 was passed, but now insists we must pretect the creditor.

I want to suggest this truth, that if the gold standard is a good thing, we ought to declare in favor of its retention and not in favor of abandoning it; and if the gold standard is a good thing, we ought to declare in favor of its retention and not in favor of abandoning it; and if the gold standard is a bad thing, why should we wait until seme other mations are willing to help us to let go? So if they come to meet us on that we can present the history of our nation. More than that, we can tell them this, that they will search the pages of history in vain to find a single instance in which the common people of any land have ever declared themselves in favor of a gold standard. (Applause.) They can find where the helders of fixed investments have. Mr. Carlisle said in 1858 that this was a struggle between the idle helders of idle capital and the struggling masses who preduce the wealth and pay the taxes of the country, and, my friends, it is simply a question that we shall be define upon which side shall the Democratic party fight. Upon the side of the ide, holders of idle capital, or upon the side of the struggling masses? That is the question that the party must answer first, and then it must be answered by each individual hereafter. The sympathies of the Democratic party, as described by the platform, are on the side of the struggling masses, who have ever been the foundation of the Democratic party. Applause.)
